I know where I'll be on Saturday, October 2! Touring the homes and businesses that are a part of the Green Buildings Open House! Yes, this popular event is happening at locations in **[County]**. Get ready to be inspired as you view a range of clean, renewable energy options at work on **Saturday, October 2, from 10 AM to 4 PM!** Talk to homeowners and business owners in our area who have been in the trenches – what worked, what didn't work, what would they do differently? Did they really save green by going green? And, speaking of green, the event is free in most locations. Last year more than 15,000 people participated in some 600 tours. To see how your neighbors are reducing their carbon footprint and cutting their energy bills through the power of the sun, wind, smart building design, and energy efficient appliances and technologies. Visit www.nesea.org/greenbuildings for locations close to home. See you out there, at Green Buildings Open House!
