

Destination Sites ~ Hamden County

Host's Name(s):

Mike Kocsmiersky

Location:

Springfield, MA
37 Preston Street

Description of site:

After the snow, the house should have a solar hot water system following a solar electric array. We also have a solar attic fan. I have conducted adult education programs in the past on solar electricity and I would be willing to give students ideas for take home projects such as building a solar oven or making a solar water purifier.

Availability for visits:

It is best to visit after April 1st, when I can accommodate 2 visits.

Considerations and opportunities noted by host:

Visit www.kosmosolar.com to learn more information. The Springfield Museum Quadrangle is a nearby kid friendly attraction.

To arrange a visit and interview:

Call Mike at (413) 734-1456

Directions:

Ask when making arrangements.
